Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This first Office Action is in response to Applicant's originally filed Application received in the Office on December 12, 2003 in this case.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on January 16, 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant claims "A bracket for securing a mailbox". However, claim 3 recites "at least one fastener securing the flange to a corresponding flange on the mailbox". It is unclear whether Applicant intends to claim the subcombination of the bracket or the combination of the bracket and mailbox. Claims 3 and 4 have been treated below as though Applicant intended to claim the combination.

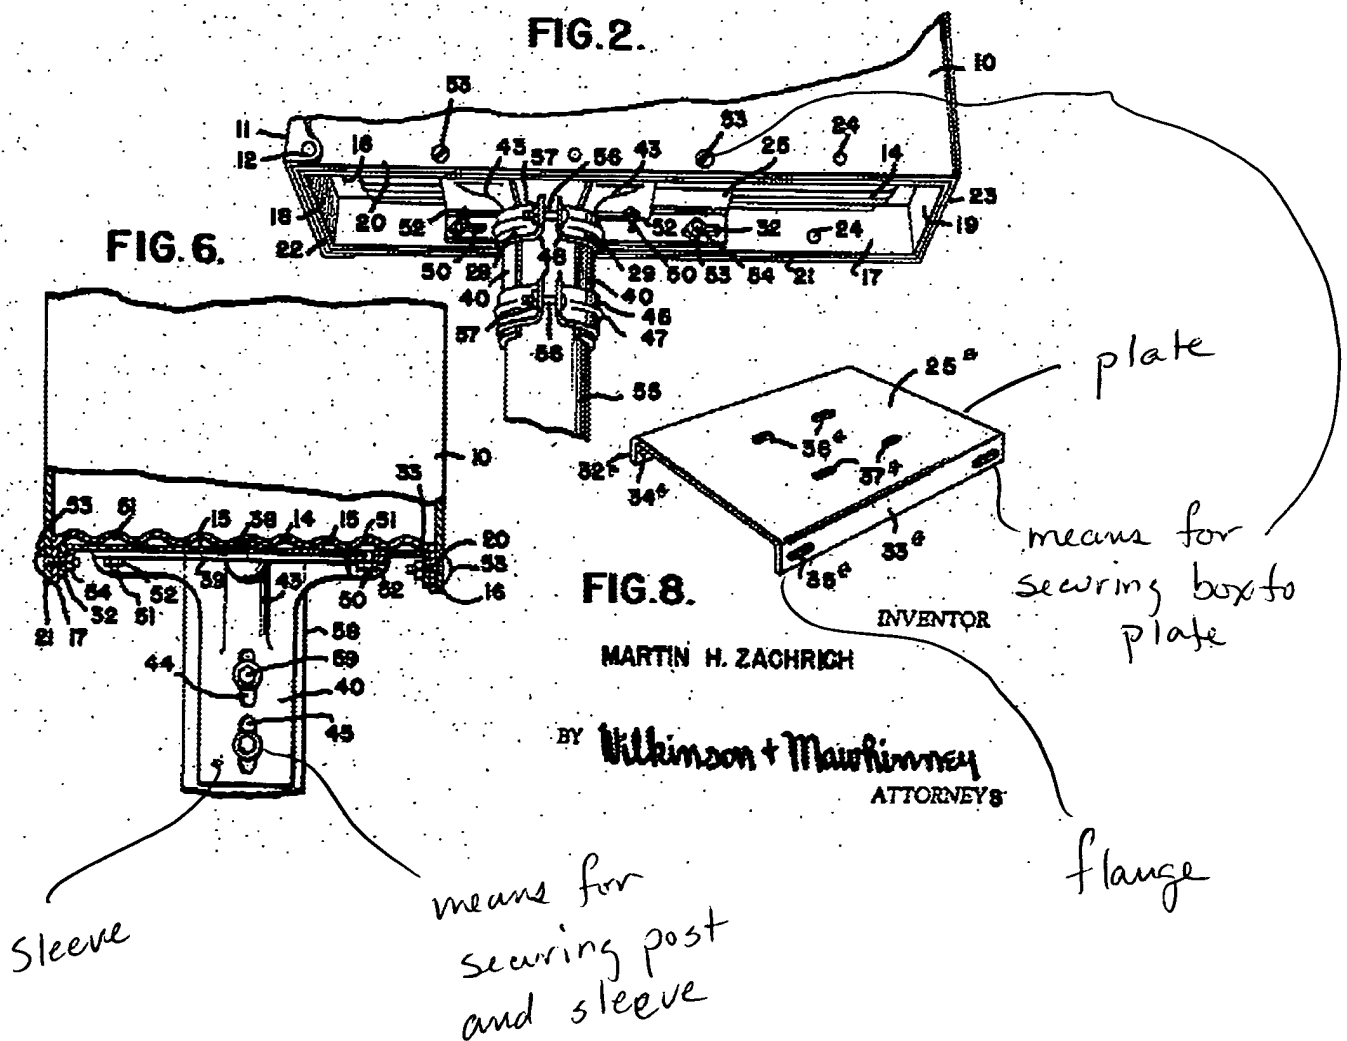

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Zachrich (2,552,915). McCracken teaches each feature of the claimed invention as shown below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 10 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zachrich (2,552,915), in view of Speece et al. (5,664,748). Zachrich teaches, substantially, each feature of the claimed invention as discussed above. Zachrich does not teach lightening holes. Speece et al., however, teaches material saving holes that are inherently lightening holes. It would have been obvious to one of ordinary skill in the art at the time of invention to modify Zachrich's plate to include material saving holes as taught by Speece et al. and that inherently function as lightening holes in order to reduce the cost of Zachrich's bracket.

Prior Pertinent Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. '957 to Kobilarcik et al. teaches a mailbox holder secured to a vertical post.
